

Toyota Forklift Parts

Toyota Forklift Parts - In the U.S., Toyota Materials Handling inc., or TMHU, has been the top selling lift truck supplier since 1992. Proudly celebrating more than 40 years of performance, the Irvine, California situated company presents a wide-ranging line of quality lift vehicles. Attributable to their history of excellence, reliability, and resilience, Toyota remains prevalent in this aggressive market. Quality is the foundation of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to persistent progress, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to manufacture high quality lift vehicles while offering first-rate customer support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's leading lift truck dealer and is amongst the magazines impressive World's Most Admired Companies.

New Meaning to Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck maker can meet Toyota's record of protecting the environment while simultaneously advancing the economy. Environmental responsibility is an important aspect of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more elaborate 2010 emission standards. The finished creation is a lift truck that creates 70% less smog forming emissions than the current Federal standards allow.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and community parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been spread through Toyota Industrial Equipment's system of sellers to non-profit organizations and local customers to help sustain communities all over the United States

Toyota's lift trucks offer superior strength, visibility, productivity, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also known as "SAS"•, helps decrease the risk of accidents and accidental injuries, and increasing productivity levels while minimizing the likelihood of merchandise and equipment breakage.

System Active Stability is able to perceive circumstances that could lead to lateral instability and likely lateral overturn. When one of these factors have been detected, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

The SAS systems were originally adopted on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped boost Toyota into the lead for industry safety standards. Now, SAS is adopted on virtually every modern internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory operator education, overturn fatalities across all designs have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% fall in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's hardnosed standards continue far beyond the machinery itself. The company believes in offering widespread Operator Safety Training programs to help users meet and exceed OSHA standard 1910.178. Instruction packages, video lessons and assorted resources, covering a wide scope of topics-from personal safety, to OSHA policies, to surface and cargo conditions, are accessible through the supplier network.

Ever since the sale of its first lift vehicle in the U.S. to the manufacture of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained a solid existence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of property. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and

service components, with the whole commitment exceeding \$113 million dollars.

The new NCC was designed to function for TMHU customers and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a training center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most comprehensive and inclusive client support and customer service in the industry. The company's new and Certified Used lift vehicles, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
