Doosan Infracore America is the fastest expanding forklift company in the North American marketplace, due to their consistency in maintaining a high degree of customer service quality and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. lift Truck division located in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled forklifts as part of a national machinery expansion venture. Initial product sales of this industrialized equipment focused on large business groups, the armed services and on state-run companies. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a situation of significant growth of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This project proved highly successful for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting versions they had established through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
