

Aerial Work Platforms

Aerial Work Platforms - There are lots of accessories used for forklifts which can be utilized in order to help expand the functionality of your forklift and allow you to lift objects, handle materials with less effort or to finish clean-up tasks.

Some attachments were specifically designed for the blades themselves. For example, fork extensions can be used when you need much more blade length, that increases lifting capability. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another kind used if transferring rolled material so as to make sure it does not roll off of the standard flat forks.

Examples of lifting attachments comprise pivoting and telescoping boom or crane accessories. They could come in several various styles and are normally meant for transferring lumber, poles, metal bars and various sort of bulky stuff. Additional accessories such as other kinds of hooks and hook plates are obtainable to be able to pick up objects using a chain or sling. Slab lifters and magnetic filters are other objects that can be used along with hook attachments. Slab lifters are specialized attachments that are designed for picking up different materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that attach to your lift truck to be able to make transporting rolls of carpet easier. The attachment connects onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are numerous various kinds of lift truck accessories that could be intended for facility maintenance like snow blades. These blades attach to front end loaders and could transport materials like for instance dirt, soil and snow. Other popular cleanup accessories include standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the forklift blades hook onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments like on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up easy and quick.

A material spreader is another lift truck attachment that is normally used at facilities. These spreaders are handy for a variety of applications such as spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment that numerous businesses make use of day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units accessible which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location with the use of the lift truck. Larger platform units have added space for employees in order to carry tools and other necessary things intended for the task. Often work platforms are constructed of poly material or steel.
