

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

During their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable marketplace for a product that could promptly and safely lift individuals in the air to accomplish maintenance and other building functions.

Following their return from vacation, John set up a partnership with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design elements of that original lift into current models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into several global markets and continues to cultivate modern machinery to ensure that clients are able to become safer and more efficient within their workplace.
