

Clark Forklift Parts

Clark Forklift Parts - At present, there are at least 350,000 Clark lift trucks performing globally, and upwards of 250,000 in commission in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specific items built for 20 distinctive models of forklifts and automated equipment. Your regional Clark Dealer is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The components warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to provide the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very amazing global support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the material handling industry.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional commitment to safety is currently a customary feature on every lift truck.

Clark's relentless mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the globally accepted quality standard ISO 9001 for each and every one of their manufacturing plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing market position.

Clark has chosen the structure of "Lean Production" at all of its assembly facilities for the reason that this method is particularly economical and permits minimal use of resources. Developed to ensure maximum proficiency, this system is designed to discover and acknowledge the most effective methods for production plant stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing costs. The contemporary value engineering agenda combines modern product development and delivers improved consumer support and service within the industry.
